

THE BEAUTY AND MAGIC OF A WILD FLOWER GARDEN.

“Friends of Wycoller” Wildflower Garden Restoration Project 2011.

Overgrown

Clearing and Preparation

Seeded

Visit in the summer to enjoy the peace and beauty of this Wildflower garden.

A **Native Wildflower Garden** creates a rich, healthy place for nature and for people, bringing colour, life and the chance to take some quiet time out from busy lives.

A **Wildflower Garden** supports birds, bees, butterflies and an abundance of other insects providing food, and a place to shelter and breed.

Nature is struggling in the Wild but we can make a difference with Creative Conservation.

By planting wildflowers in our parks, open spaces, allotments, along our roadsides and in our gardens, we are directly supporting their survival giving us all a better chance of adapting to climate change and environmental stress.

Flowers always make people better, happier and more helpful; they are sunshine, food and medicine to the soul.

[Luther Burbank](#)

Bread feeds the body, indeed, but flowers feed the soul.
